KOKUYO

ABOUT US

KOKUYO

KOKUYO is a “WORK & LIFESTYLE company” that designs experiences, crafting them across four core areas: Spatial Design, Furniture, E-commerce, and Stationery.

In 1905, KOKUYO began its journey as a small shop in Osaka specializing in ledger covers. Since then, while expanding our reach from stationery to advanced workspace solutions, we have remained steadfast in our commitment to craftsmanship and user-centric design.

The way we work and the environments we work in are constantly evolving. Yet, the essence of human activity—creating value through thought and collaboration—remains unchanged. We believe that our decades of human-centered research will bring new, meaningful value to the office furniture of the future.

DESIGN

Duora2 is a functional office chair featuring a “duo frame” and a weight-sensing mechanism that automatically adjusts to your weight, providing an instant, intuitive fit. The pelvic support and independent forward-tilt seat precisely follow your body as you transition between leaning forward to focus and reclining to rest.

Highly functional, yet elegantly understated.
It offers a clean aesthetic that harmonizes with any space, while maintaining a quiet individuality.
Striking on its own, seamless in multiples. Designed for every environment.

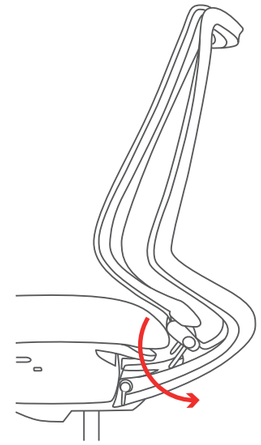

FEATURES

Engineered functionality: "duo frame" structure

Seamlessly concealed within the elegant ”duo frame”,
the integrated pelvic support ensures optimal working posture for every user.

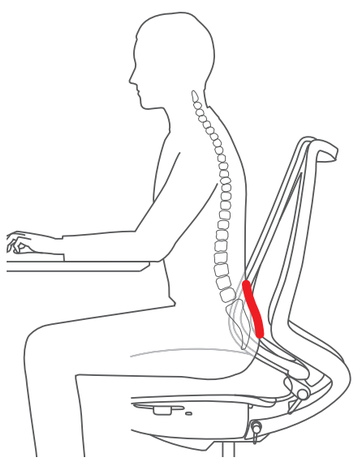

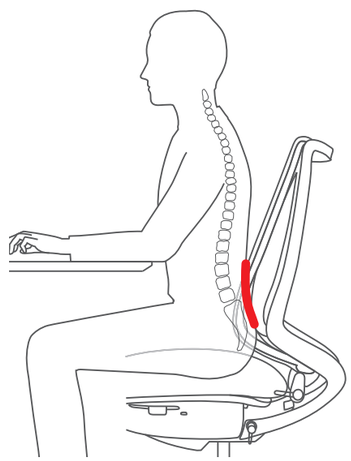

Adjustable pelvic support in 3 positions

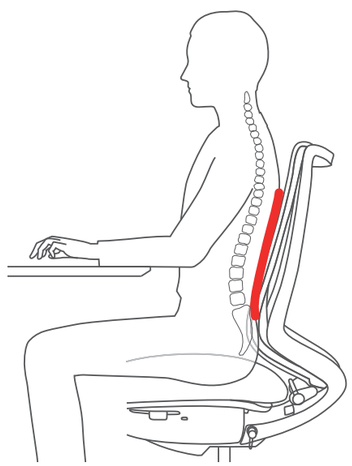

The lower backrest can be set inwards to one of 3-positions to provide support to the lower back, thus holding the pelvis in place to maintain adequate seating posture.
Easily adjusts to a backward leaning, upright, or forward leaning position.

Forward leaning

Upright position

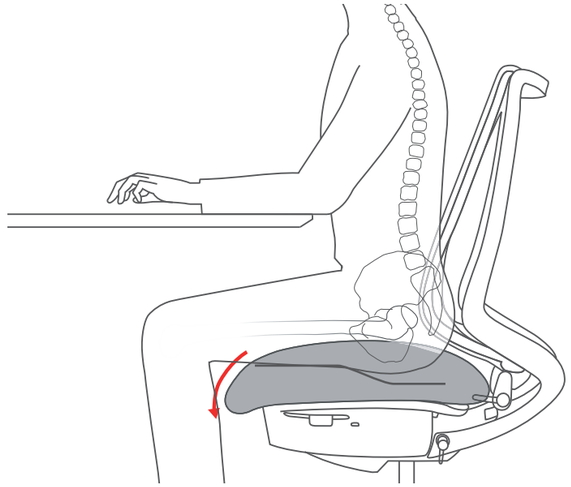

Backward leaning

FEATURES

Forward seat tilt

The seat surface automatically adjusts to forward and backward leaning postures in response to body movement. This maintains the spine's natural S-curve, even when leaning forward. Furthermore, the auto-tilt mechanism improves weight distribution and relieves pressure on the back of the thighs.

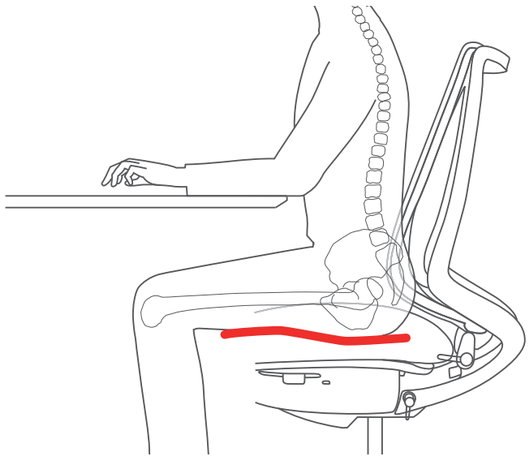

Posture support seat

Designed with a dual-layer cushion and base, this seat cradles the pelvis for stable, enveloping support. It prevents forward sliding to maintain proper posture and evenly distributes body weight, keeping you comfortable through long working hours.

FEATURES

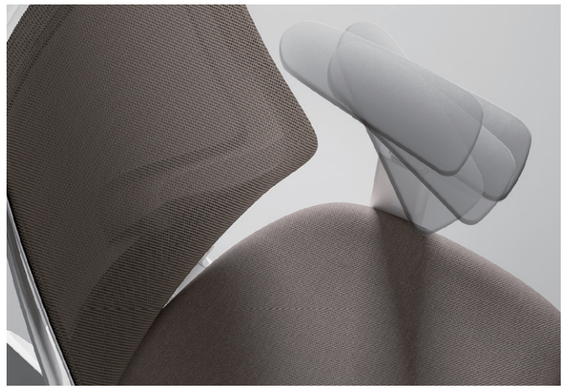

In shared workspaces, a chair must instantly adapt to anyone who sits in it.
As our work styles evolve, so do our postures — constantly shifting between leaning forward to focus and reclining to reflect. Duora2 addresses these needs with intuitive operation and automatic adjustments, effortlessly supporting both shared use and dynamic movement.

Auto-fit synchro tilt

The backrest fluidly follows your movements, providing a balanced recline and stable support at every angle.
Choose from four back stop positions
—upright (0°), 6°, 13°, or 20°—
and easily adjust the tilt tension to match your own weight and preference. With just one lever and one dial, every user can intuitively find their perfect fit.

2-way motion armrest

2-way motion armrests with a wide adjustment range to suit different seating postures. They easily accommodate various body types, ensuring optimal ergonomic support and comfort for every user.

Adjustable headrest

Height and angle adjustable headrest accommodates various body types and working postures. Support to the back of the head, effectively reducing strain on the neck and upper back.

DIMENSIONS

With headrest

Without headrest

Adjustable range (mm)

Seat depth	400-450
Seat height	410-530
Width between arms	445-465
Tilt lock angle	0°, 6°, 13°, 20°
Arm height from floor	620-840
Arm height from seat	210-310
Headrest height from seat	650-800
Headrest angle	30°

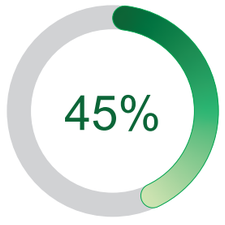

SUSTAINABILITY

Material compositions

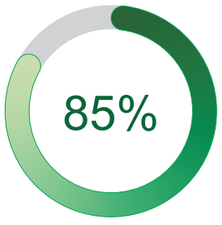

Thermoset resin	7.0%
Thermoplastic resin	70.0%
Steel	21.1%
Synthetic fiber	1.9%

Recycled resin

Percentage of recycled resin within total resin used in the product (by weight).

Recyclability

Calculated based on the disassembly capability into single materials. Actual recycling rates may vary by region.

*This data represents the black frame model without a headrest.

Long-life design

Office chairs are composed of numerous parts. This is why we are committed to environmental sustainability, such as using recycled materials for various components. The backrest and seat upholstery and cushions can be replaced even after purchase, allowing for longer use than the original Duora.
