Beau

Soft Style

Smooth, organic curves combine with indulgent proportions and softness for a modular lounge system providing an unsurpassed level of comfort. Beau’s comprehensive range of seating and table units, designers can craft a relaxing landscape that encourages conversation and collaboration.

The definition of *Comfort*

We put comfort at the heart of our design process testing countless combinations of layered foam – at different densities and thicknesses – and spring configurations. Only once we'd arrived at the perfect sit did we sculpt Beau's voluptuous outer form.

Designer Boss Design

Sensory Experience

Inspired by smooth, soft dough that rises to overspill the pan, Beau's full curves and oversized proportions exude an elegant sense of relaxation and comfort, while its gentle organic lines share the same design language as other products in the portfolio.

Finished luxurious fabrics, Beau offers a sensory experience, with the depth of the seat, pitch of the back and crafted softness of its cushioning inviting users to sit back, relax and feel at one in the space. Beau's 120-degree turns are a refreshing alternative to the right angles of other modular systems, encouraging users to converse, collaborate and connect. This extends to digital connectivity via the option to include device chargers in the table units.

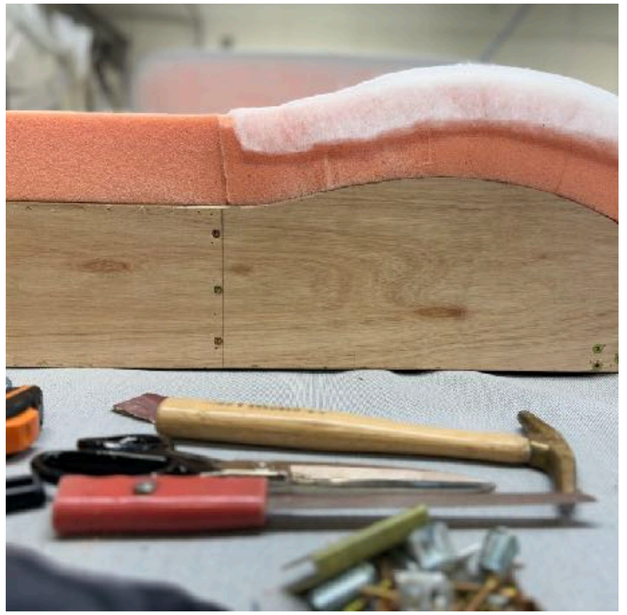

From vast atria to bijou meeting spaces, Beau provides the opportunity to craft an atmosphere of relaxation and openness through a wide selection of modular units including single and two-seaters, benches, sitting chaise, 120-degree corners, end arms, end tables, and joining tables.

Beau

Purity of Form

Traditionally manufactured in the UK using responsibly sourced plywood, steel and foam from local suppliers, Beau is designed to last. Seating units can be easily disassembled for reupholstery – extending the lifecycle and lowering the environmental impact of the product.
