Duora2

Duora2 is designed to elevate the modern workspace through the perfect balance of comfort and function. By actively supporting your spinal alignment, this intelligent chair responds gracefully to your daily rhythm, providing dynamic flexibility for focus and secure stability for rest.

PRODUCT CERTIFIED FOR LOW CHEMICAL EMISSIONS: UL.COM/GG UL 2818

ANSI/BIFMA x5.1
GREENGUARD Gold
AFRDI Blue Tick

FEATURES

Duo frame.

Fluid Motion, Firm Support.
Duora2 is a functional office chair featuring a “duo frame” and a weight-sensing mechanism that automatically adjusts to your weight, providing an instant, intuitive fit. The one-lever pelvic support and independent forward-tilt seat precisely follow your body as you transition between leaning forward to focus and reclining to rest.

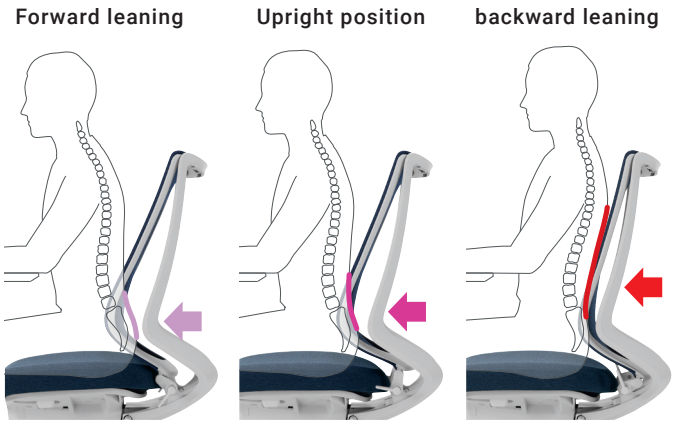

FEATURES

3-support functions to maintain the spine's natural S-curve.

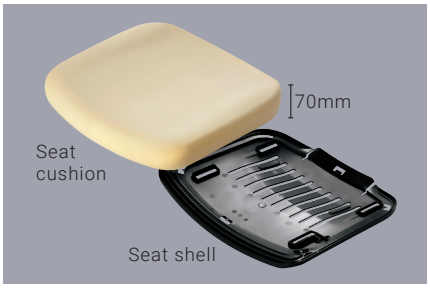

Adjustable pelvic support in 3 positions

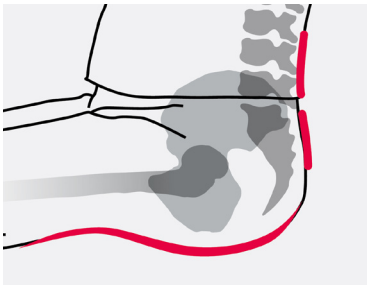

The lower backrest support can be adjusted to three positions, stabilizing the pelvis to maintain proper posture. Easily adjusts to a backward leaning, upright, or forward leaning position.

Posture support seat

The pliable, contoured seat shell firmly holds the pelvis in place while allowing for even weight distribution and flexible movement.

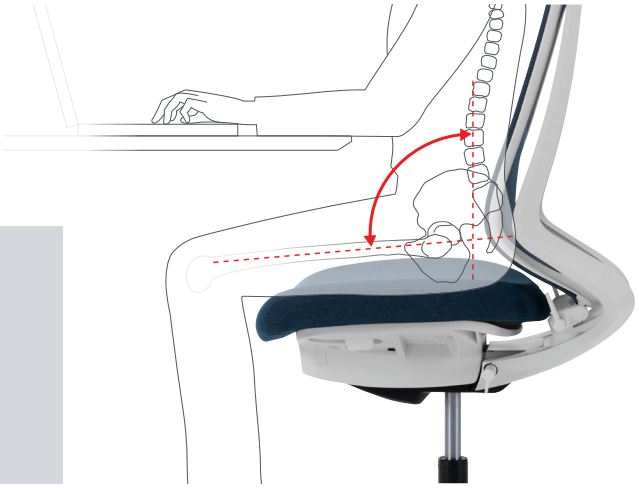

Forward seat tilt

The seat surface automatically adjusts to forward and backward leaning postures in response to body movement. This maintains the spine's natural S-curve, even when leaning forward. Furthermore, the auto-tilt mechanism improves weight distribution and relieves pressure on the back of the thighs.

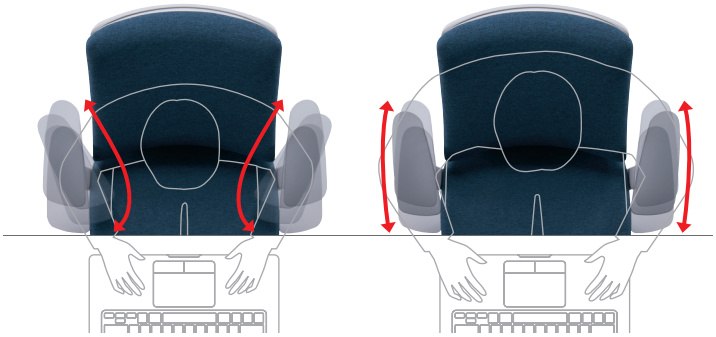

FEATURES

2-way motion armrests

2-way motion armrests with a wide adjustment range to suit different seating postures. They easily accommodate various body types, ensuring optimal ergonomic support and comfort for every user.

The lift lever is located under the armrest. Since the fingertips can reach the lever while the hand is on the armrest, it is easy to adjust both vertically and horizontally.

Writing/PC work

Relaxed posture

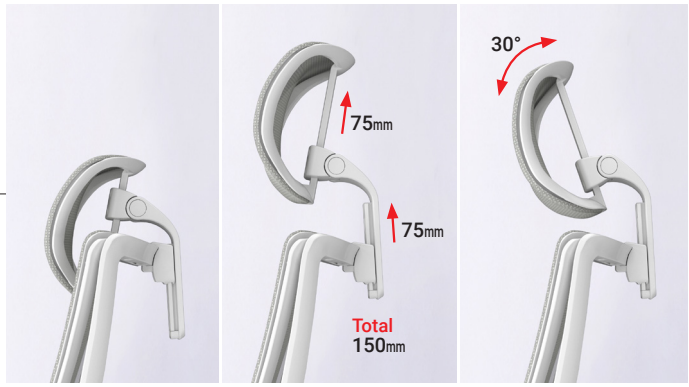

Sustainable design for the future

The backrest and seat upholstery and cushions can be replaced even after purchase, allowing for longer use than the original Duora.

FEATURES

Adjustable headrest

Height and angle adjustable headrest accommodates various body types and working postures. Support to the back of the head, effectively reducing strain on the neck and upper back.
Height range: 150mm
Angle range: 30°

Auto-fit synchro tilt

Synchro backrest with smooth unhindered tilt. Stabilizing counterforce to maintain balance, and weight operated tilt tension control.

Tilt angle adjustment

The tilting angle is selectable from 4-settings.
[Upright fixed position (0°), 6°, 13°, 20°]
